

Walkers Trail Masters Report

Well another Year has almost past... 2019 is almost over.

Self-Abuse and **Wet spot** have almost finished their time as Trail masters for the year. Townsville Hashers made their way around the city streets and country roads this year, thanks to the Hares that set some amazing walks for us this year, and a big thank you for the trails that had our favourite drink stops.. for some trails we were given maps to follow and some we were not, but half the fun is seeing sights along the way. But we all know that the walkers pack usually makes in back to the drinks trailer safely.... ..Mind you when **Wet spot** first started leading trail and trying to follow the Hare's maps, lots of Hashers had to be called upon to help get us home.

From the flooded streets in February to the dusty Kelso track in September, we have seen some sights this year. The Celebration run that stretched around the Ross River Dam to the Red dress Run through the City Streets.

Wetspot did abandon Self Abuse in August when she decided that she might try and become a runner, Self-abuse being the true champion that he is continued to lead the pack through Townsville's streets on a Monday night.
